A. SIGNIFICANT ITEMS

None to report.

B. OTHER ACTIVITIES

1. [] of EE has suggested an idea relating to development of tradecraft glosseries. [] will discuss further next week.

2. [] of WE has brought us a special personal language training problem for which we have proposed an acceptable solution involving a combination of tutorial and internal class training. (We are trying to keep down to a minimum tutorial training for both pedagogical and financial reasons. Much authorized tutorial training could be avoided if people would plan ahead to take advantage of all quality-training in the Washington area which is adequate to meet most training needs. A clear and publicized policy, and reasonable application thereof, is needed.)
